factories

Skupino ROTO predstavlja 10 družb s proizvodnjo v štirih evropskih državah. Podjetje je v zasebni lasti in že preko 42 let prisotno na domačem in tujem tržišču kot uspešen proizvajalec izdelkov iz plastičnih mas in zanesljiv poslovni partner.

Z več kot 4000 izdelki do volumna 50 m³ in letno predelavo preko 3 milijon kg polimerov spadamo med vodilna podjetja s proizvodnjo po tehnologiji rotomolding v Evropi.

Z lastnim razvojnimi oddelkom in proizvodnjo iz leta v leto širimo in razvijamo številne nove izdelke. V povprečju izdelamo dva nova izdelka na teden.

S funkcionalno oblikovanimi izdelki zagotavljamo dodano vrednost izdelkom, povečujemo kakovost izdelave, nudimo prodajne storitve, vgrajujemo komponente v plastične izdelke tako, da zagotovimo celovito rešitev problemov kupcem. Uporabljamo inteligentne materiale in sodobne tehnologije proizvodnje. Proizvodnja je organizirana v skladu z ISO 14001 in 9001.

ROTO is a global producer of high-quality plastic products from polyethylene, polypropylene, polyamide, XPE and ABS with production factories in four European countries. ROTO is a family business that has been presented on the market as a successful manufacturer and a reliable business partner for more than 40 years.

With more than 4000 products up to the volume of 50m³ and annual processing of over 3 million kg of polymers, ROTO is one of the leading companies that feature the rotomoulding technology production in Europe. Its development and production departments expand and develop a wide range of new products on a yearly basis.

On average, the company produces two new products a week. With its functional design, it provides the products with added value, increasing the quality of production, offering sales services and integrating components into plastic products so as to ensure comprehensive solutions to customer problems. ROTO uses intelligent materials and modern production technology. The production is conducted in accordance with ISO 14001 and 9001.

Odporno na udarce
Shock-resistant

Izdelan v skladu z EU standardi
Produced according the EU standards

Skupine izdelkov v različnih volumnih
Groups of products: same design, different size

Majhna teža in enostavno prenašanje, vzdrževanje
Very light and easy to carry and maintain

Odpornost na visoke in nizke temperature, UV stabilen material
Weatherproof and UV radiation-resistant

Okolju prijazni material in proizvodnja, možnost 100% recikliranja
Ecological: non-toxic and recyclable

Material primeren za shranjevanje živil, hrane in pijače
Food contact material

PALETE PALLETS

PALETE
PALLETS

VISOKO ZMOGLJIVE PALETE HIGH-PERFORMANCE PALLETS

Visoko zmogljive palete iz kakovostne plastične mase in odporne proti udarcem, so vsestranski pripomoček pri skladiščenju ter transportu blaga. Primerne so tudi za industrijo, ki zahteva higienične manipulacijske pogoje, saj gladka površina palet onemogoča zadrževanje vode ter čistil. Prečke palet so razvite tako, da omogočajo dodatno ojačitev z jeklenimi komponentami in tako povečajo nosilnost do 3000 kilogramov.

High-performance shock-resistant pallets made from high-quality plastic mass are a versatile accessory for storing and transporting goods. They are also suitable for use in industrial hygienic manipulation conditions, given that their smooth surfaces hinder water and cleaner retention. Pallet beams are made in such a way that they enable additional reinforcement thanks to steel components, increasing the load capacity up to 3000 kilograms.

| Šifra Code | Produkt Article | Dimenzija [mm] Size [mm] | Statična nosilnost [kg] Static load [kg] | Dinamična nosilnost [kg] Dynamic load [kg] | Regalna nosilnost [kg] Racking load [kg] | Teža [kg] Weight [kg] | Material | Barva Colour |

Palete so primerne za manipulacijo in skladiščenje izdelkov v papirni industriji. Razvite so na podlagi standarda, ki določa velikost papirja B1 in B2 in za avtomatizirani proizvodni postopek ter ročno manipulacijo izdelkov na/iz palet. Na voljo v dveh dimenzijah z gladko ali rebrasto površino.

Pallets are suitable for manipulation and storing of industrial paper products. They are developed in accordance with the standard providing the B1 and B2 paper size and for the automated production process as well as manual handling of products on pallets. Available in two sizes, with smooth or ribbed surfaces.

ULTRALAHKE PALETE ULTRALIGHT PALLETS

Ultralahke palete kljub nizki teži odlikuje visoka statična in dinamična nosilnost, saj pri veliki obremenitvi poskrbijo za optimalno stabilnost. Palete se zlagajo ena na drugo, s čimer prihranimo 60 % prostora med skladiščenjem in povratnim transportom. Primerne so za transport in skladiščenje v industriji s posebnimi higieniskimi pogoji ter za mednarodni transport.

Ultralight pallets are, in spite of their low weight, distinguished by the high static and dynamic load capacities, given that they ensure optimal stability for heavy load. The pallets are stacked onto one another, thus saving 60% of the space from storage to return transport. They are suitable for transportation and storage in special industrial hygiene conditions as well as for international transport.

| Šifra Code | Produkt Article | Dimenzija [mm] Size [mm] | Statična nosilnost [kg] Static load [kg] | Dinamična nosilnost [kg] Dynamic load [kg] | Teža [kg] Weight [kg] | Material | Barva Colour |

UL - opisuje ultralahko paleto
UL - denotes an ultralight pallet

Palete za skladiščenje higien斯kega blaga nimajo votlih prostorov, tako da se bakterije na njih teže zadržujejo. Mehansko so zelo obstojne, trdne in se zelo enostavno čistijo ter imajo visoko odpornost na poškodbe, mikrobe in bakterije. Razvite so bile posebej za transport in skladiščenje higien斯kega blaga. Na voljo so z zaščitnimi robovi ali brez.

Pallets for storing hygienic goods do not have any empty spaces, so that the bacteria are not as easily retained. Mechanically-wise they are extremely durable, solid and very easy to clean, at the same time demonstrating a high level of resistance to damage, microbes and bacteria. They have been specifically developed for transportation and storing of hygiene goods. They are provided with or without protective edges.

REGALNE PALETE RACK PALLETS

Palete s teleskopskimi profili so primerne za uporabo v proizvodno-distribucijskem centru. Profile je mogoče sneti in zložiti v palete, kar omogoča racionalen izkoristek tovornega ter skladiščnega prostora.

Pallets with telescopic profiles are suitable for production and distribution centres. The profiles can be removed and stacked into pallets, which ensures a rational utilization of cargo and storage space.

Vertikalni rezervoarji z veliko odprtino in pokrovom na navoj se uporabljajo za shranjevanje in transport tekočin. Rezervoarji so izdelani iz belega materiala in imajo ob strani integrirano merilno skalo, ki omogoča odčitavanje volumna. Izdelani so iz polietilena, ki je odporen tudi na kisline in baze ter visoke in nizke temperature.

Vertical tanks with a big opening and a screw lid are used for storage and transportation of liquids. The tanks are made from a white material and include integrated measuring scales showing volume. The material, polyethylene, is resistant to acids and alkalis as well as high and low temperatures.

VERTIKALNI REZERVOARJI ZA SKLADIŠENJE

VERTICAL STORAGE TANKS

Rezervoarji so izdelani iz polietilena in so primerni za skladiščenje in transport različnih živil ali materiala. Integrirani ročaji omogočajo prenašanje polnih sodov in se ne morejo zlomiti. Rezervoarji so opremljeni s pokrovi na navoj.

The tanks are made from polyethylene and are suitable for storage and transportation of various foods and materials. Integrated handles allow for the transfer of full barrels and will not break. The tanks are equipped with screw lids.

OGLATI ZABOJI SQUARE BOXES

Trpežne polietilenske kadi so primerne za transport in shranjevanje grozdja, sadja ali skladisčenje vinskih steklenic. Ojačan rob kadi omogoča, da lahko nanj namestimo mlin za mletje sadja. Dno kadi je lahko tudi paletne izvedbe, kar omogoča transport kadi z viličarjem. Oglate kadi zavzamejo malo prostora in jih lahko zlagamo eno na ali v drugo.

Durable polyethylene boxes are suitable for transportation and storage of grapes and fruits or simple storage of wine bottles. The reinforced edge allows for the mounting of a mill for grinding fruit. The bottom part can also be of a pallet construction, which enables for the boxes to be transported by a forklift. Square boxes take up little space and can be stacked onto or into one another.

IZDELANO PO MERI

CUSTOM-DEVELOPED

PREDNOSTI

1. Razvoj po zahtevah kupcev
2. Brezplačno recikliranje po uporabi
3. Personalizacija (logo, barva, že pri malih serijah)
4. Možnost maloserijske proizvodnje
5. Dodatna oprema za sledenje in označevanje blaga
6. Dvoslojni in izolativni material
7. Dodatne komponente za povečanje nosilnosti
8. Inteligentne rešitve (npr. racionalizacija transportnih volumnov)
9. Rešitve po meri za specifične zahteve v notranji in zunanji logistiki

ADVANTAGES

1. Customised production
2. Free recycling after use
3. Personalisation (logo, colour, incl. small-scale production)
4. Possibility of small-scale production
5. Additional equipment for labelling goods
6. Double-layer and insulating material
7. Additional components to increase load capacity
8. Intelligent solutions (e.g. rationalisation of transportation volumes)
9. Customised solutions for specific requirements in internal and external logistics
