

RAIN GARDEN

Catch the rain, go green again

roto
since 1949

Roto Group is an international company specialized in the production of plastic products. The roots of the family-run business go back to 1949. ROTO employs more than 550 people in 9 factories located in different European and African countries.

Roto generated revenues of €110 million in 2024, selling products in 65 countries around the world.

Roto is European leading rotomoulding company, producing more than 4,400 different products. The company's development is ensured by continuous innovation, new technologies and materials that ROTO develops together with scientific institutes, universities and other companies.

The Roto-branded product groups are divided into four segments: products for agriculture, garden, sport and ecology. The use of composites and biodegradable and recycled polymers enables the production of the most complex products on the market.

EY world
family award

Roto also manufactures a wide range of components products for various industries such as automotive, marine, construction and agricultural machinery, aquaculture and logistics. Added value innovative design, the use of intelligent polymers and composites, upgrade of products with accessories.

Collect fresh rain water with Rain Box to water your plants and experience a drastic low in your water bill. A convenient size for garden, terrace and balconies. Barrel is made of recyclable, UV-treated, impact-resistant polyethylene to withstand the elements. Because of shape the Rainbox can be placed near the wall or you can make garden fence with them. This product is not intended to be filled using a mains water supply. If mains water filling is used, a ventilation hole with a diameter of 8 mm must be drilled at the top of the planter to prevent deformation due to internal pressure.
